

Senior Hazardous Materials Consultant/Team Leader

Environmental Monitoring Services provides a complete range of environmental and occupational hygiene consultancy services addressing environmental and hygiene issues to ensure regulatory and statutory obligations are met.

A pioneer in this sector when it was founded twenty years ago, it has over the intervening years created an outstanding reputation for the efficacy of its feasible and cost effective environmental protection solutions.

The firm is keen to appoint a Senior Hazardous Materials Consultant/Team Leader to their Botany based team.

Role

You may be working for a larger corporate or a niche player. You have acquired considerable expertise in this specialist field but now feel your effectiveness is constrained by bureaucratic inflexibility or insufficient scope. Autonomy is what you are after - applying your initiative and judgement to your projects without being micromanaged.

Talking about projects, the range is diverse and will include the following functions;

- Hazardous Materials Audits
- Safe Work Method Statements
- Environmental Management Plans
- Asbestos Airborne fibre monitoring
- Waste Assessment and classification
- Signatory level NATA

Candidate

You will be degree qualified and have at least 5 years relevant experience and be currently or previously NATA accredited within a similar organisation. Preference will be shown to candidates who have attained Signatory level or Laboratory management role.

A professional with leadership skills, you will have the ability to communicate effectively at any level.

Package

On offer is a competitive salary package that will be based on the skills, qualifications and experience of the successful candidate. It comprises a base salary plus super and a fully maintained vehicle. The package range is in the range of \$95,000 - \$105,000

Apply

Candidates whose application most closely match the selection criteria will be contacted to arrange an initial interview
